# About Us.

---

**We are a Structural and Civil Engineering Consultancy Company with vast experience in the Architecture, Engineering and Construction fields. Thanks to our team's expertise, we can provide a wide range solutions to companies facing problems in the field.**

No matter the size of your project, our services will adjust to meet Scope, Quality and Deadline requirements. At INGEBER, we undertake every project with professional integrity, responsibility and enthusiasm.

It is our main goal to stand out as Engineering Consultants recognized for our strict execution standards, professional trajectory, and experience in our field.

Because engineering means perfection, INGEBER is committed to continuously improve its Quality Management System by meeting our clients' expectations and providing advice with constant feedback.

# Engineering Consulting.

## Areas of Expertise

Our engineering expertise covers Civil and Structural engineering.

Starting from a comprehensive and detailed analysis of each particular case, we manage to undertake all kind of engineering challenges.

### Structural Engineering

- Design of reinforced and prestressed concrete structures for commercial, residential and industrial use.
- Design and detailing of steel structures for commercial, residential and industrial use.
- Design, analysis and detailing of road and railway bridges up to 60 meter span.
- Pile and slab foundations engineering.

### Civil Engineering

- Railway Infrastructures design in inter-urban areas.
- Road Infrastructure projects.
- Design of erosion control and coastal protection works.

### Grain Processing and Oil & Gas Industry

- Electromechanical designs for solid grain processing.
- Design and calculation of pressure vessels and API tanks.
- Piping design and engineering.
- Turnkey plant projects.

# Staff

## Meet our team

### Leonardo M. Bertolo

CEO - Structural Engineer

- Master Degree in Steel Structures.  
Universitat de Barcelona.
- Head Professor of Structural Analysis III.  
Universidad Tecnológica Nacional – Argentina.

Role:

- Team Leader.
- Project Manager and Cross-functional Coordinator.

### Matías A. Duarte

Civil Engineer

Role:

- Structural Designer.
- BIM Manager.
- Document Coordinator.
- QA Lead.

### Enrique Caporicci

Mechanical Engineer

Role:

- Hydraulic Equipment Design Specialist.
- Atmospheric and Pressure Vessel Design Specialist
- BIM Modeler.

### Javier Lluan

Mechanical Engineer

Role:

- Piping and Fluid Transportation Specialist.
- Fire Installations Design and Specification section.
- Pneumatic Installations Designer.
- Finite Element Analysis Modeler.

### María Belén Granero Ferrer

Accountant

Role:

- Administrative Manager.
- Financial Manager.
- Foreign Trade Officer.
